NUMBER OF SPECIAL DAYS IN BETWEEN TWO DATES

In this coding exercise you will be expected to develop a method that finds the number of days that matches specified the day of week and the day of month. For example, your method should be capable of finding the number of days that are Monday and 10th of the month between the years 2021 and 2050

1. The incomplete method is as below.

```java
public static int SpecialDaysCount(int startYear,
                   int endYear,
                   int dayOfMonth,
                   DayOfWeek dayOfWeek) {

}
```

2. The main method is as below

```java
public static void main(String[] args) {
    System.out.println( SpecialDaysCount(2021, 2021, 10, DayOfWeek.WEDNESDAY));
}
```

3. Output is as below

```
3
```
